MIGUEL LEÓN GARCÍA MARTÍNEZ

Java Backend Developer

miguel.leon.garcia@outlook.es · (+34) 699 379 948 · Almagro, Ciudad Real · **linkedin.com/in/miguelleongm** · github.com/Sefirr-dot · sefirr-dot.github.io

PROFESSIONAL EXPERIENCE

Junior Software Developer Jul. 2025 – Present

Inetum · Miguelturra, España (Hybrid) · Client: OEPM – Oficina Española de Patentes y Marcas

- Resolved critical incidents in daily batch processes managing thousands of industrial property files, reducing processing errors by 25% through Java/COBOL pipeline integration on Linux servers.
- Led technical migration of legacy Linux server infrastructure (2006 → 2025), modernising the environment with CI/CD practices and improving system stability by 35%.
- Maintained and evolved mission-critical SOAP services using Java 8, Apache CXF and advanced WSDL contract management for enterprise-level integration.
- Executed manual migration of 5+ enterprise applications from Java 8 to Java 17: code refactoring, Maven dependency updates and removal of deprecated APIs, improving performance, security and Spring Boot 3.x compatibility.
- Optimised complex SQL queries and stored procedures in Oracle DB, achieving a 40% improvement in response times for production environments.
- Increased software reliability by implementing automated validation tests with JUnit, ensuring 100% coverage for all new feature deployments.
- Coordinated development workflows under Agile/Scrum, using Git for version control and SonarQube to maintain high code quality standards.

> ***Key Project · ALTERA WEB — Document Digitisation System (replacement of legacy .NET platform)***
>
> - Engineered full-stack platform with Spring Boot 3.5 & Java 17 backend (REST API with 18+ endpoints, document lifecycle management, task system, full audit trail, bulk CMS upload) and React 19 + TypeScript frontend (Vite, Tailwind CSS 4, Radix UI), supporting 500+ daily users.
> - Strengthened system security via Keycloak 26 (OAuth2/JWT): role-based access control (RBAC) for 6 roles integrated with the corporate Active Directory.
> - Integrated JAX-WS 4 SOAP services with UCM, Platanot and Platarec; implemented PDF processing (pdf-lib, pdfjs-dist), OCR (tesseract.js) and automated reporting with JasperReports.

Software Development Intern Mar. 2025 – Jul. 2025

Inetum · Remote · Client: OEPM – Oficina Española de Patentes y Marcas

- Developed Java backend components for SOAP and REST services, maintaining 99.9% data integrity in high-availability professional environments.
- Streamlined data access layers using SQL in Oracle DB and managed complex code branches efficiently with Git.
- Enhanced software quality by implementing 25+ unit test cases with JUnit and proactively monitoring technical debt via SonarQube.

EDUCATION

Higher Technician in Multi-platform Application Development (DAM) Sept. 2023 – Jun. 2025

IES Maestre de Calatrava · Ciudad Real, España

TECHNICAL SKILLS

Languages: Java 17, Java 8, TypeScript, JavaScript ES6+, SQL, Python, C#

Frameworks & Libraries: Spring Boot 3.x, Spring MVC, Spring Core, JPA/Hibernate, React 19, Angular, Tailwind CSS, Radix UI, Vite, Apache CXF, JAX-WS, Java EE, Node.js, Express, tesseract.js, JasperReports

Databases: Oracle DB, Stored Procedures, JDBC

Security: Keycloak, OAuth2, JWT, RBAC

DevOps & Tooling: Git, GitHub, Maven, Docker, Jenkins, Linux, CI/CD, WSDL

Code Quality: JUnit, SonarQube, TDD

Practices: Agile, Scrum, REST APIs, SOAP, Microservices, Code Review

LANGUAGES

Spanish: Native

English: B2 Independent User · Cambridge B2 First, Score 163 (Jul. 2019)

CERTIFICATIONS

Spring Ecosystem: Spring Boot & Spring MVC 5, Spring Core 5, Java EE Web Development, Java 8 — openwebinars.net (2024)

SQL & Data: SQL from scratch — openwebinars.net (2024)

Methodologies: Scrum Technical, Git — openwebinars.net (2024)

Frontend & JavaScript: Angular, Node.js & Express, JavaScript Intermediate & ECMAScript 6 — openwebinars.net (2024)
